

Guideline for individual export sales within the EU

For individual export sales within the EU the following documents and specifications are mandatory:

- Passport or id-card copy of the buyer. All identification documents have to be valid and the signature has to be legible.
- Valid phone number, fax number or e-mail address of the buyer.

Customers need to adhere to the following at the time of payment or pick-up:

- Payment has to be made by bank transfer.
- Only the authorization for pick-up provided by us will be accepted.
- The authorization has to be completely filled out and signed by the buyer – providing us with the name and address of the authorized person or Transport Company.
- The authorized person has to have a valid passport / id-card available at the time of pick-up.
- The authorization must be on hand before pick-up, sent to us either by fax or e-mail.
- In case the buyer will be picking up the vehicle personally, the issue concerning the authorization is to be omitted.
- For the purchase of the temporary license plates for transfer (yellow plates) at the local registration office you will need a valid id-card or passport.

Important:

It is mandatory that the buyer is here to look at the car personally before signing the contract!

Should even one of the above mentioned criteria do not comply with all of our demands, any possibilities for pick-up are eliminated!!

Please contact our export-team before the appointed time of pick-up, so it can be guaranteed that nothing will prevent the delivery of the vehicle.
